Xylem invites WEFTEC 2019 attendees to join them in the *Opportunity of a Lifetime*
Solving water holistically through advanced technology and deep expertise

CHICAGO – Sept. 18, 2019 – Global water technology leader Xylem (NYSE: XYL), is inviting visitors of the Water Environment Federation's Annual Technical Exhibition and Conference (WEFTEC), Sept. 23-25 at McCormick Place in Chicago, to contribute to creating a world that is more water-secure and sustainable. Attendees will have the *Opportunity of a Lifetime* to learn about Xylem's portfolio of integrated solutions spanning the entire water cycle and also to share their personal commitment to solving the global water crisis via the company's social investment program, Watermark.

"During this critical period in our history, we have the unique opportunity to change global water management in a meaningful way," said Ron Askin, Vice President, Sales, Water Utilities, Xylem. "WEFTEC serves as a powerful industry touchpoint for Xylem to advance water accessibility and affordability, and increase community resilience through new technology and the knowledge of our people."

At **Xylem Booth #1248**, attendees will be led on a journey through the water cycle, showcasing myriad options the company offers to solve for today's most pressing water issues, including:

- Operating strategy, costs and labor
- Stormwater and flooding
- Aging infrastructure
- Stressed water supply
- Regulatory compliance

Make an Impact with Xylem Watermark

This year, WEFTEC attendees are challenged to join Xylem Watermark's commitment to solving the world's water crisis through education, disaster response and access to clean water. Visitors are encouraged to fill out a water drop from the Xylem booth outlining how they are contributing to solving water. For every drop submitted, Xylem Watermark will make a \$10 donation in their name to one of three projects that align with the program's three areas of focus.

"When we talk about providing people with the opportunity of a lifetime, we're not just talking about products, technologies and brainpower — though all these elements are an essential part of Xylem's offering," said Jamie Saxe, Senior Director, Watermark and Corporate Social Investment, Xylem. "When we combine these capabilities with our Watermark program, we're able to make a lasting impact on communities around the world. To share this mission with individuals outside our organization brings us even closer to solving water."

Each project will be implemented in conjunction with one of Watermark's core partners — [Mercy Corps](#), [EarthEcho](#) and [Planet Water](#). Visit <https://mywatermark.benevity.org/community> to learn

more about each project. Water drops are available to print prior to WEFTEC and bring to **Booth #1248** by clicking [here](#).

At the Xylem Booth

Experience the *Opportunity of a Lifetime* by signing up for a guided tour of Xylem Booth #1248 during the run of the show. Requests must be submitted before noon each day. Tours will demonstrate to attendees how Xylem can help with smart water management across the water cycle. Book your tour [here](#).

Xylem will also showcase several products and technologies, as well as the expertise behind them, including:

- **Stormwater solutions** — Xylem's comprehensive stormwater management offering is detailed in a [new handbook](#). Also featured is the new Godwin Smart Series pump NC100S 4" Dri-Prime dewatering solution with next generation cloud-based Field Smart Technology, and temporary water management systems from Xylem Rental Solutions.
- **Wastewater collection processes** — Xylem pipeline management solutions are highlighted, including Pure condition assessment technology, Smith-Blair innovative pipe fitting and repair solutions, and the Emnet BLU-X drainage network and treatment plant optimization, an open architecture urban watershed platform with an integrated Real Time Decision Support System platform for water utilities to solve the toughest treatment and collection system challenges.
- **Flygt Intelligent Pumping Solutions** — Headlining Xylem's large pump offering is the Flygt Concortor® Integrated Intelligence Pumping System, which provides clog-free pumping operation to save up to 80 percent in cleaning costs and up to 70% in overall energy costs.
- **Xylem Decision Intelligence offering** — A holistic approach to water management that harnesses the power of digital technologies to transform utility economics and operations, [Decision Intelligence](#) uses digital solutions, including sensor networks and advanced data analytics, to inform smarter choices for water and wastewater operations, maintenance and capital planning.
- **Wastewater treatment systems** — In two augmented reality demonstrations, Xylem is showcasing its Wedeco Duron UV wastewater system and three Sanitaire biological treatment technologies, including Vorelodos, a complete aerobic digester system, CASPERON, a bundled conventional activated sludge solution, and ICEAS a continuous flow SBR system.

Also on display are Leopold filtration solutions, including underdrain systems that reduce backwash water consumption by up to 50%, and the YSI IQ SensorNet Alyza Analyzer will lower operating costs by controlling dosing for chemical phosphorus removal and optimize processes by monitoring biological phosphorus removal.

NEWS RELEASE

- **Flygt adaptive mixing technology** — Xylem's industry-leading Flygt adaptive mixer range continues its expansion with the addition of the 4230. Debuting this year are automated process monitoring and controls for adaptive mixing. The new ADC configuration option provides professionals the choice of hand controls or the use of a process control module, providing even greater overall operational and energy savings.
