Isolation Flanges

The isolation flange is a combination of an isolation ball valve and a companion flange for circulators. The isolation flange allows easy service or replacement of the circulator without the need to drain the system. The isolation flange fits the Bell & Gossett NRF/NBF/SSF wet rotors, Series PL, Series 100, PR, LR, and ecocirc 20-18 and ecocirc+ 20-18 circulators. Available Sizes: ¾", 1", 1¼" & 1½" (refer to dimension and weight table for details)

Typical specifications

Furnish and install on plans _____ inches NPT/Sweat x Flange Check-Trol Flange on the pump discharge. The Check-Trol Flange will prevent gravity circulation and flow in the wrong direction. When closed, it will provide positive shut-off. The mating flange shall be free floating allowing it to rotate eliminating the need to align the bolt holes of the flanges when installing to the piping system. The Check-Trol Flange shall be constructed with a brass body, chrome plated brass ball, chrome plated steel flange and handle, and PTFE packing and seat ring and a non-ferrous check. The Check-Trol Flange shall be manufactured by Xylem – Bell & Gossett or equal.
