

Complete wastewater management

Safety. Compliance. Peace of mind.

At Xylem, we recognize that as regulations become more difficult and concerns about long-term liabilities increase, customers need a company who they can trust to identify and help solve hazardous and non-hazardous waste and wastewater handling issues. We are your partner, providing the technical knowledge, experience, and reliable services to help protect the safety of your employees and neighboring communities as well as complying with the federal, state, and local laws. We take seriously the responsibility to develop sound policies and procedures for handling your waste disposal needs and delivering you peace of mind that your liability is minimized and compliance ensured. Best of all, our service allows you to concentrate on your business.

Our goal is to provide solutions and services to our customers that are safe and ensure regulatory compliance. Our facility strives to minimize land disposal by recovering metal values in wastes received from our customers. This is at the core of our waste residuals management system.

Putting safety first

Our business requires us to manage hazardous waste professionally and each employee takes personal responsibility for maintaining an accident-free workplace. We have invested in equipment and developed processes to minimize risks and challenges inherent to treating large volumes of hazardous wastes. Our well-trained staff maintains aggressive Q/A programs and conduct regular operations audits to ensure an on-going commitment and emphasis on safety for our employees and the community.

Benefits of choosing Xylem for handling your hazardous waste challenges include:

- RCRA-permitted hazardous waste treatment, storage and disposal facility
- All receipts are treated on-site or are assumed by Xylem & shipped off-site as Xylem residuals
- Impeccable compliance and safety record
- Staff of experienced professionals who understand RCRA and are focused on customers' needs
- Capability to provide industrial wastewater ion exchange services including those for groundwater remediation
- Ability to receive tanker quantity shipments
- Manifesting and DOT packaging and labeling services available
- Responsive scheduling of deliveries and pickups
- Ability to arrange transportation throughout the lower 48 states

Centralized treatment & recovery

Core industries serviced by these facilities include:

- Aerospace
- Automotive
- Metal finishing
- Parts washing
- Microelectronics
- Printed circuit board manufacturing
- General industry
- Groundwater remediation
- Solar manufacturing
- Environmental cleanup contractors

Xylem specializes in the recovery of metals from customers waste and wastewater. Our centralized treatment & recovery facility is designed and permitted to process liquids and solids carrying the following EPA (Environmental Protection Agency) waste codes:

- D001 Oxidizers
- D002 Corrosives (acid & caustic)
- D003 Cyanides & sulfides
- D004 Arsenic
- D005 Barium
- D006 Cadmium
- D007 Chromium
- D008 Lead
- D009 Mercury
- D010 Selenium
- D011 Silver
- F006 Metal hydroxide sludge
- F007 Cyanide plating bath
- F008 Cyanide tank bottoms
- F009 Spent stripping solutions w/ cyanide
- F019 Plating sludge, chromating aluminum

Xylem also provides solutions for many other industrial wastes that may not be RCRA regulated, but still cannot be discharged to sewer or local landfill. Boiler cleanout, low level metal rinsewaters, parts washer effluent or bag house dust are just a few examples of the variety of non-regulated wastes also accepted and processed by Xylem.

Complete waste process control

Xylem provides service solutions to help industries comply with federal, state, and local regulations related to the handling, treatment, and disposal of hazardous wastes and wastewaters. Xylem's centralized treatment & recovery facility focuses on recovering metals value from customers' wastes to allow for further reclamation in the metals industry and to minimize the amount of waste destined for land disposal.

Focus on customer needs

Xylem provides a total integrated solution to customers' water and wastewater challenges. Our centralized treatment & recovery facility is accomplished in easing customers' hazardous and non-hazardous waste and wastewater issues.

Xylem offers a wide range of services, from initial investigations and pilot lab studies to design, implementation and operation of wastewater ion exchange systems and receipt and management of drums, bags, totes or tankers of hazardous and non-hazardous wastes and wastewaters.

At Xylem, we make it our business to help you minimize waste, reduce costs, and preserve the environment and we will not sell you a service and walk away. We are your long-term waste treatment partner. Answers to your waste treatment, recovery, and recycle questions are just a phone call away. Our expert staff is available to assist and offer advice on waste identification, profiling, and transportation.
