

Loading Background Charts into HYSWEEP® EDITOR

By Monique Lee

You can load background charts to reference your multibeam survey in the HYSWEEP® EDITOR.

1. **Go into HYSWEEP® EDITOR and load up your data files.**
2. **In Phase 1 of editing, select VIEW-OPTIONS** or click the 'View Options' icon on the tool bar. A View Options dialog box will come up.
3. **On the 'Survey' tab, check the box labeled 'Show Charts.'** The Survey window includes the project background files its display.

Once you are in Phase 3, you can view the soundings on your background chart. This is a great reference feature for those ‘where the heck is this’ moments!
