Sounding Better!

2018 Worldwide HYPACK Training Seminars, Trade shows and Conferences

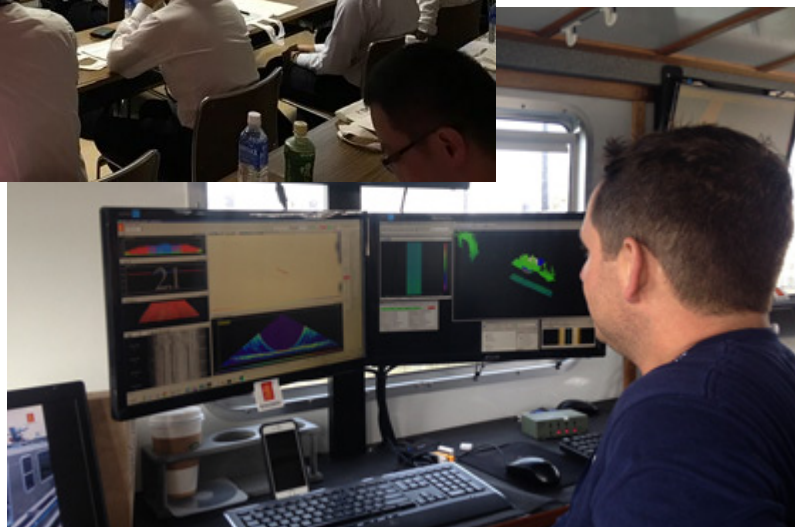

By Lourdes Evans

After a successful unveiling of HYPACK® 2018 at our January HYPACK 2018 training event, our team is now ready to travel the world to spread the HYPACK® knowledge. We will hold several seminars and training courses, and participate in trade shows and conferences around the world. Our 3-day training seminars will cover all aspects of single beam and multibeam hydrographic surveying, and dredge management using our HYPACK®, HYSWEEP® and DREDGEPACK® packages.

We will also hold several Multibeam and Volumes courses for those expert users that want more in depth, practical training. Our seminars and courses are a low cost opportunity for you to learn about the latest HYPACK® 2018 software and a great opportunity to meet with our HYPACK Team. Bring your great ideas and requests for features you want to see implemented to make your job easier and more efficient.

Please check the list below for a seminar and conferences near you. If you would like us to hold a seminar in your country, please email us at training@hypack.com

Here are some of the 2018 International HYPACK training seminars planned for the upcoming year. More to be added!
