Sounding Better!

HYPACK – A Xylem Brand at WEDA 2018 Dredging Summit and Expo

By Christine Roca

HYPACK- A Xylem Brand recently exhibited at the WEDA 2018 Dredging Summit and Expo. This event is a great opportunity for us to show our most recent advancements in our dredging software and systems. We showcased our new crane system, as well as our other turn-key systems for excavators, cutter-suctions and hopper dredges.

We had many opportunities to meet new customers and prospect. We also enjoy seeing our many customers and industry partners that attend every year.

Congratulations to Ray Bergeron from Cable Arm, Inc. for winning the HYPACK Giveaway Lenovo - Star Wars™: Jedi Challenges - AR Headset with Lightsaber Controller and Tracking Beacon.

Thank you to the Western Dredging Association and partners for organizing another great expo and we look forward to seeing everyone in Chicago in 2019!

For information on our DREDGEPAK® Software or complete dredging systems please contact sales@hypack.com or visit our website at www.hypack.com.
