NEW HYPACK® LiDAR PAYLOAD WEBINAR

Follow Hannah Marshburn as she guides you through our HYPACK® LiDAR Payload solution on May 7th at 11:00AM. She will be showing us some tips and tricks and an operational tutorial of our Payload system.

This is a portable topographic LiDAR surveying solution with HYPACK for data collection and processing. The Payload is platform agnostic and robust; with an IP67 rated enclosure, the Payload is suited for use on marine vessels or in any surveying environment. We tightly integrate LiDAR and GNSS sensors through our HYPACK software, providing accurate data easily and quickly. Our budget-friendly, end-to-end solution fulfills your LiDAR surveying needs from survey planning to data post-processing.
