DREDGEPACK® Software Webinar: For all of your digging needs

INTRODUCING THE NEW HYPACK WEBSITE

Our team is excited to announce the [new HYPACK website](#) has launched, and we are ready to share it with you! This new site will enhance your experience and give you a better understanding of HYPACK and everything we have to offer.

You can still browse our products, get technical support, download our software with the latest updates, view upcoming events, read our news, and so much more on our new page.

WHAT HAS CHANGED? HYPACK's new website is hosted on our parent company's website, [xylem.com](#). The great news is that our new website is still separate and located at the same web address as before, [www.hypack.com](#). The main differences from our old site are the look and format of the new design, as well as links to [xylem.com](#), which means you can now easily view other brands from Xylem and the products and services they offer. We hope you love it!

While our new site may not be perfect at this time, we are still working on it! The site will be getting new features and formats over the next few months. With the release of new products, software updates, and training sessions, our website will always be a work in progress, so please be patient with us as we continue to make changes to improve your experience.

If you have any questions, please be sure to reach out to our team!
