

Cut-out drawing for MagFlux® - Letter.

The dotted line indicates the **MagFlux®** front panel outline and measures 155 x 145 mm or 6.10 x 5.71 inches. These measurements are valid when printed in a 100% scale. However, as some printers might shrink images when printing, it is recommended to measure the drawing after printing to ensure that it has maintained the correct measurements. For more information, see the **MagFlux®** manual available from our Download center at <https://mjk.com/download-center>.
