

To Whom It May Concern

Dear valued Customers,

We would like to inform you that, in line with our ongoing commitment to sustainability and environmental protection, future deliveries of our thermal energy flow sensor AN130 will undergo a change in external appearance.

For the threaded version, the sensor body will be delivered with a non-painted brass finish. For the flanged version, only the flange component will be painted red, while the rest of the body will remain unpainted.

Threaded Version

Flanged Version

This change is purely aesthetic and has no impact on the metrological performance or technical features of the product. All functional characteristics and compliance with relevant standards remain fully unchanged.

We appreciate your understanding and support as we take steps toward more environmentally responsible production practices.

Sincerely,

Dengke Zhu
