

623 & 624 FABRICATED MECHANICAL JOINT TAPPING SLEEVES

- Lightweight alternatives to case mechanical joint type sleeves.
- Both styles can be fabricated to your specific applications requirements in either Carbon or Stainless Steel.
- Both utilize gland gaskets, suited to applications where pipe condition at the tap location will not accommodate a neck seal.
- The 624 style has true MJ end seals as opposed to the 623 that has more of a coupling design.
- For more information, please contact Smith-Blair customer service or your Territory Manager.

Fabricated 623 and 624 styles are priced on specific application and therefore non-returnable
