FlowTracker2 Software Version 1.7

SonTek, a Xylem brand has released FlowTracker2 software version 1.7.

- Section 1 describes new features available in software version 1.7.
- Section 2 gives information for updating to software version 1.7.
- Section 3 gives contact information for SonTek.

1. Changes and Features in Software Version 1.7

- a. Handheld keypad programming modification to prevent accidental and unintended keypad lockup. Recommended for all users.
- b. Handheld electronics revision resulting in an expected battery life of approximately 11 hours of continuous use under normal operating conditions.

2. Installing the Software Update

To install FlowTracker2 Software Version 1.7:

- a. Login to the SonTek website and download the *.zip file from the link on the FlowTracker2 tab here: <http://www.sontek.com/software-archive/index>
- b. Unzip the file.
- c. Go into the folder called PC, and run one of the two *.msi installation files corresponding to the PC's Windows OS (32-bit or 64-bit). Be sure to install the SonTek USB driver to enable direct communications.
- d. Connect to the FlowTracker2 Handheld using the USB communications cable to avoid possible wireless connection interruptions.
- e. If the latest firmware is not detected, a notification will appear in red that an upgrade is available.
- f. The Upgrade function will open a dialog to select the FlowTracker2 *.ft_firmware file. Select the appropriate file and click 'Open' – the firmware upgrade will begin automatically.
- g. Wait until the firmware update is successfully completed.
- h. The FlowTracker2 is now ready for use.

3. Contact Information

We welcome any comments, questions, or suggestions you have regarding FlowTracker2 software version 1.7.
