

Asset Repair, Refurbishment & Upgrade

- 1 Design & Consulting
- 2 Installation & Commissioning
- 3 Operation & Maintenance

Get the Most Out of Your Investment

Because water and fluid handling assets play a mission-critical role in your operations, you need to make sure this hard-working equipment reliably delivers optimal performance. With Xylem's deep OEM engineering expertise and advanced repair capabilities, we can help you minimize downtime while extending the life of a pump.

For everyday repairs like replacing impellers, cables or wear plates, Xylem's field technicians are always on call to diagnose and fix equipment on site. If a more complicated workshop repair is required, we have a coast-to-coast network of fully equipped facilities for fast turnaround. When it's time to restore a pump back to original OEM specifications, we provide the complete range of services needed to refurbish equipment for years of continuous use, including factory alignments, rebabbiting and remachining. And with Xylem's ability to custom engineer equipment upgrades, we can improve the performance of a pump beyond the original design with new motors, new coatings, advanced impeller materials and VFDs.

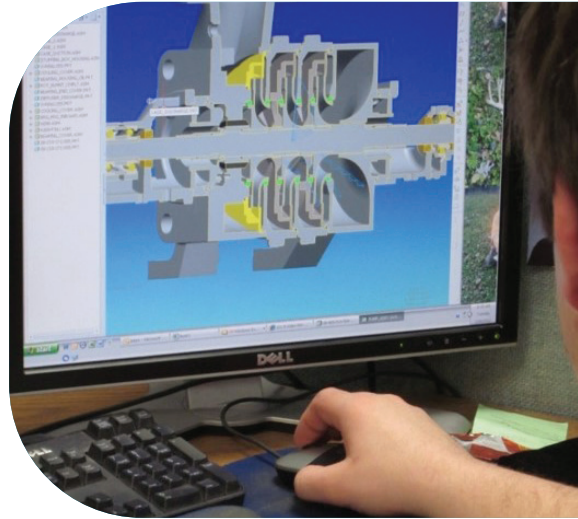

Key benefits:

- 24/7/365 engineering and field support
- Access to a North American network of state-of-the-art testing facilities
- Deep expertise in Xylem products as well as those from other OEMs
- Backed by a one-year Xylem warranty

Capabilities

- Preparation & Planning
- Field inspections, diagnostics and performance testing
- Complete repair and refurbishment for all sizes of pumps
- Material and coating upgrades
- Hydraulic design upgrades
- Mechanical design upgrades
- Repair vs replace analysis
- Finite element analysis (FEA)
- Computational flow dynamics analysis (CFD)
- Critical speed analysis
- Vibration analysis
- Sump studies
- 3-D modeling
- The largest indoor pump test facility in the Western Hemisphere

Xylem Service Solutions

As the world's most trusted water and wastewater experts, we provide the full range of technical and field support needed to achieve greater efficiency, reliability, and compliance. From designing smarter next-generation systems to 24/7 turnkey operation, it's our job to help you solve water and fluid challenges.

What Sets Us Apart

Unrivaled water and fluid expertise

Anybody can sell a piece of equipment, but only Xylem Service Solutions brings deep, trusted know-how to every job – driving greater performance across your entire operation.

Comprehensive, integrated portfolio of services

When it comes to mission-critical applications, we provide an integrated blend of both standard and advanced support – everything you need to minimize risk, maximize uptime and control lifetime costs.

Flexible, scalable, and responsive

Because your needs and budgets are constantly changing, we can engineer a tailored service solution for any size project that delivers the most value year after year.
